

# TOP TREAD STAIRWAYS

## Company Profile

*Pre-built Stairway Solutions  
for California*

**Top Tread Stairways** manufactures all types of wood stairs for residential and commercial projects throughout California. We pre-build the body of the stair and ship it as a custom pre-built unit to the jobsite to expedite construction scheduling and safety.

With our background in new home construction, we understand how contractors think. We realize builders deal with more competition and tighter schedules than ever before; therefore must have the ability to control cost and efficiency more than ever before.

We know our customers want only the best products and services. Since the stairs are built off site, we save our customers days in the building process. No more wasted materials or juggling schedules with framers in regards to stairs. **Eliminate project delays today!**
