**If site-built stairways are slowing down your crew,  
then pre-built stairs are the right solution for you!**

Pre-built stairways are pre-manufactured in a shop much like the factory-built components you already use: windows, door units, trusses and cabinets.

As a new home builder, you are concerned with meeting schedules and staying within your budget. Top Tread Stairways produces all types of wood stair systems, fully assembled in our shop (excluding railings) and shipped direct to your jobsite as a complete unit.

### **Our Stairways:**

- are constructed primarily from Southern Yellow Pine and OSB but can be built from many other woods such as Oak, Cherry, Maple and Walnut for interior applications or composite for exterior applications
- are held together by screws, nails, glue, wedges and blocks, and feature housed stringers for greater strength
- are built with high-quality kiln-dried lumber to last generations
- are fast and easy to install, and save you over 173 saw cuts and 424 nails or screws

**Eliminate project delays today!!**
